Try this engaging SEL/DEI lesson

Introduction (5–10 minutes)

- Engage students in a discussion about diversity and storytelling through art. Start by introducing Faith Ringgold and Romare Bearden, artists known for their narrative artwork that focuses on diverse subjects and depictions of people’s everyday lives.
- Show specific examples of their artworks that portray narratives, cultural stories, or personal experiences.
- Lead a discussion using questions such as the following:
 - What stories do you think the artists are telling through their artwork?
 - What colors, lines, patterns, and textures do you see? How do they help tell the story?
 - What cultural elements or symbols do you notice in the artworks? (Trains, roosters, church events, hats, buildings, musical instruments, words)
 - How do these symbols give you clues about the artist’s life?
 - What types of media do you see? (Painted paper, collage, paint, ink, fabric, etc.)

Instructions

Exploring personal narratives (25–40 minutes)

- Then, have students think about the stories about their lives that they want to tell with their own artwork. These could include favorite childhood memories or a common scene from their neighborhood. Have them make a list of ideas and then quickly do a thumbnail sketch of each one to see which composition they like best. After students have chosen their scene, encourage them to think about the variety of materials they want to use, as well as cultural or personal symbols they want to incorporate. They can also incorporate words or sentences that are important to them.
- Provide a variety of pencils, markers, paint, paper, paper dolls, face cutouts, and mixed media, including yarn, beads, fabric, and patterned origami paper to create the background, furniture, people, clothing, and objects in their artwork.
- Before students begin, demonstrate how to incorporate mixed media techniques by combining different art materials to add depth and texture.
- When students are finished, have them think about what they would like to name their piece. Then display finished artwork with the name of the piece next to it.

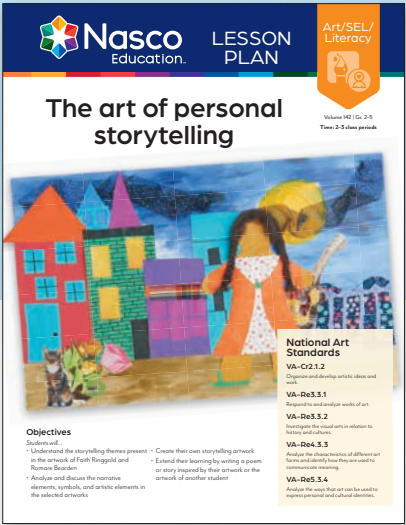

Writing extension (25–40 minutes)

- Partner with classroom teachers to introduce the extension component during core class time. Explain that both art and writing can be forms of storytelling and that they are going to use art as inspiration for their writing.
- Instruct students to choose either their own artwork or the artwork of another student to write a poem or a short story about.
- Encourage them to explore the emotions and ideas the artwork suggests. They should use descriptive words to activate the senses. What does the artwork make them see, hear, feel, smell, or taste?

Sharing and community building extension (30 minutes)

- Ask each student to present their artwork and read their story or poem aloud to the class. Encourage active listening and positive feedback and emphasize the importance of creating a supportive community where everyone’s voices are valued and celebrated.
- After each presentation, facilitate a brief discussion where students can offer compliments, ask questions, or share their thoughts on the themes and messages conveyed. Encourage students to provide constructive feedback, focusing on the strengths and unique qualities of each artwork and written piece.

Thames & Kosmos Robotics: Smart Machines – Sidekick
Gr. 3-9 Give students an amazing robotic buddy to build and control. Sidekick has two modes: 4-wheeled rover or 2-wheeled robot. It can be programmed from a built-in keypad or included app. Includes 129 pieces and 36-page guide. Requires 4 "AA" batteries. Tablet or smartphone required to use Sidekick app (available for iOS and Android). Not for sale in Canada. **NE30283** — **\$69.95**

Thames & Kosmos Remote Control Machines Space Explorers Experiment Kit
Gr. 3-9 Ready your courageous robots for a mission to the moon, Mars, or beyond! The remote control controls up to three motors, which move the rover back and forth, turn the wheels to steer the rover, and control the robotic arm to pick up extraterrestrial specimens like small rocks. With 256 pieces, you can build not only the rover, but nine other space-themed models. A full-color, 80-page, step-by-step manual helps students assemble all the models and teaches them about real-world examples of outer space robots. **EL14871** — **\$99.95**

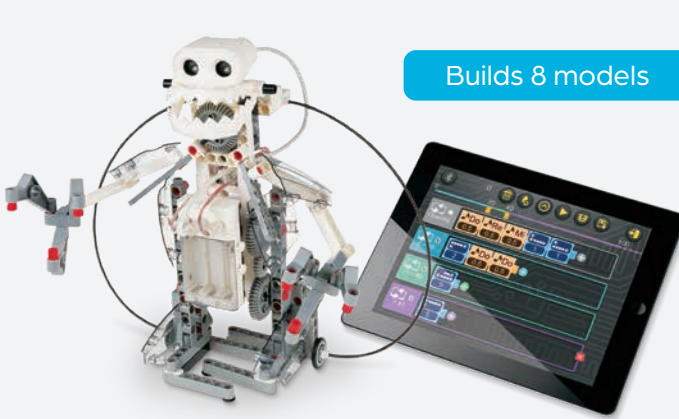

Thames & Kosmos Robotics: Smart Machines – Tracks & Treads
Gr. 3-9 Students will have everything needed to build 8 robots that use continuous tracks, also known as tank treads, to move. In addition to constructing the models, they'll learn how to use the included visual programming app to code. Includes 197 pieces and 60-page guide. Models require 3 "AA" batteries. Tablet or smartphone required to use programming app (available for iOS and Android). **NE30280** — **\$139.95**

Individual Student Small Circuitry Kit
Gr. 3–12 Get more than one week’s worth of projects and lessons in this handy kit that can be sent home for distance learning or kept in the classroom for individual lab time. Students’ imaginations will soar as they create simple circuits using conductive Maker Tape. Kit includes batteries, roll of Maker Tape, LEDs, binder clip, and online directions in English and Spanish. **NE30039 – \$10.95**

Individual Student Large Circuitry Kit
Gr. 3–12 Three weeks of projects and lessons that work either in the classroom or can be sent home for virtual learning. Each kit contains enough materials to create a Bristlebot (SB50347), Solar Bug (NE30035), LED name badge (NA10419), and several paper circuit projects with additional batteries, roll of Maker Tape, LEDs, binder clips, self-sticking motor, and online directions in English and Spanish. **NE30040 – \$30.95**

Paper Circuits
Gr. 4+ Create circuitry projects in minutes using Maker Tape conductive tape and LEDs — no wires needed. Download and use one of many templates and build guides, or create a new idea of your own.
Standard Kit. Includes 16’ conductive nylon tape roll (¼”), 10 CR2032 batteries, 30 jumbo LEDs, and 10 binder clips. **SB53207 – \$25.95**

Customary/Metric Tape Measures

This 60" plastic tape measure with inches on one side, and centimeter and millimeter markings on the reverse. Assorted colors. Pkg. of 10. **TB15183 – \$5.95**

Classroom Lab Thermometers

Metal, with Celsius and Fahrenheit scales. Celsius scale is in 1° divisions; Fahrenheit is in 2° divisions. Range of -20° to 230° F (-30° to 110° C). 5" glass spirit-type tube; aluminum back. 6½". Set of 5. **SB47135 – \$9.95**

INDIVIDUAL LEARNING MATH KITS

Tried-and-true manipulatives, curated by grade level, give teachers flexibility and help students learn no matter where they are. Each kit includes lesson guidance for teachers or parents and outlines at least 60 different activities. Kits are easy to move between learning environments — kids just toss the bag in their backpack and go. They’re a great fit for after-school programs, too!

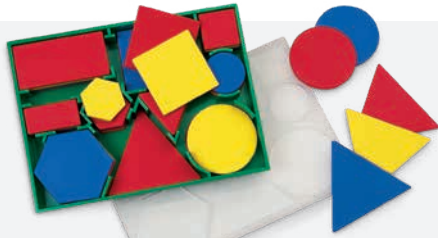

Early Years Individual Learning Math Kit
Gr. PreK–K Students will be able to answer questions such as: Can you make a tile train that is longer than 5 tiles, but shorter than 9 tiles? Can you make this pattern? Can you make a square out of the blue rods? Kit includes color tiles, Rekenrek, wood pattern blocks, coin set, number line, linking cubes, geometric solids, ten frame with counters, hundreds board, deci rods, pentominoes set, and dice (dot and numbered).
NE30015 — \$32.95

Primary Individual Learning Math Kit
Gr. 1–3 Students will be able to answer questions such as: What coin has the lowest value? What are all the different 2 number combinations to make 10, 20, 25? What 3D figures did you use to build your tower? Kit includes coins and bills set, base 10 set and mat, ten frame and counters, geometric solids set, Venn Diagram mat, deci rods, tangrams, wood pattern blocks, hundreds board, two-color counters, color tiles, linking cubes, dice (dot, numbered, and math symbol).
NE30016 — \$32.95

Junior Individual Learning Math Kit
Gr. 4–6 Students will be able to answer questions such as: Which has larger volume? Is there always more than one way to model a fraction? Using 24 tiles, how many rectangles can you make? Kit includes coins and bill set, base 10 set, geometric solids, Venn Diagram mat, deci rods, tangrams, protractor, wood pattern blocks, two-color counters, color tiles, linking cubes, and dice (dot, numbered, and math symbol).
NE30017 — \$32.95

TB09379

Attribute Blocks
Gr. PreK+ Each set has 60 pieces; 4 distinct and universal sets of attributes, 5 shapes, 3 colors, 2 sizes, and 2 thicknesses. Use in games and activities to classify, order, and discover equivalent relationships. Includes plastic sorting tray and instructions.
Attribute Block Set. For individual desktop work. Large pieces 2½" x 2½"; small pieces 1½" x 1½". **CHOKING HAZARD (I).** Not for under 3 yrs.
