

CleanSmart FAQ's

1	What's it made of?	Simple ingredients (Ionized Water, Purified Salt, and Electricity) with innovative science	All our ingredients are found in nature, we simply use an impressive electrolyzed process to re-create the active ingredient, Hypochlorous, a naturally occurring, powerful germ killer.
2	What's the active ingredient?	CleanSmart is powered by a pH-balanced, powerful germ killer called Hypochlorous	(pronounced HI-puh-KLOR-us, <u>not to be mistaken for Hydrochloric</u>), Hypochlorous is a naturally-occurring substance with an uncanny ability to neutralize germs, and a pH-balanced chemistry that means Hypochlorous will not irritate skin
3	Does it really do what it says?	EPA controlled claims – Hype is not allowed	All claims regarding germ killing and safety are highly regulated by the EPA. This means every word and every claim must first be tested by a third-party laboratory, then extensively reviewed & approved by the EPA before we can say it on our label.
4	Germ Killing PLUS Safety	No longer settling for just one. First Powerful yet Safe disinfecting product	Many products kill germs, but have nasty warning labels. There are green products that are gentle but don't kill many germs. The consumer wants - but has not had - a product with the COMBINATION of germ killing AND remarkable safety
5	Eco Friendly	Starts out as simply Salt & Water. Then, reverts back to simple salt water within days of use	Most disinfectants are man made chemicals. CleanSmart replicates what the body produces to kill germs then reverts back to simple saline water in days.
6	No Rinse Safety	Old germ killing products require a complete rinse before using again	Lysol, and other cleaners, you need to rinse off due to safety reasons. CleanSmart is so safe, you can spray and leave the product on. No rinse required safety
7	Does it clean?	Not a heavy duty grease buster, but ideal for your daily wipe-up cleaning & sanitizing needs. Spray Anywhere, No Rinse Required!	A gentle disinfectant first, Only the heaviest grease and soap scum messes are a challenge for CleanSmart. Otherwise, our cleaners are perfect for your daily wipe-up, sticky messes.
8	Replicates Chemistry from all Mammals	Nature's perfect germ killer - Hypochlorous is produced by all mammals to fight germs	White Blood cells carry Hypochlorous to the site of the infection and we replicate and bottle it for home use.
9	Power + Safety	Kills 99.9999% of Germs	No warning labels, no first Aid Instructions!
10	Clean the Mess & Kill Germs	Clean everywhere, everyday & Kill germs!	No fumes, no chemical residue, no gloves, no mask, no wipe
11	Proven Technology	Used in Industry for years	Grocers use it to mist fruits & vegetables. Dr.'s use it for wound care and eye infections.
12	Food Contact Safe	Safe to use in the kitchen	Spray anywhere, anytime
13	No Rinse Safety	Leave no residue	No need to wipe
14	EPA Registered	All Claim verified by EPA	All Data on web site @ www.cleansmarthome.com

15	Hospital Grade Disinfectant	Kills 99.9999% of viruses, bacteria, mold & mildew listed	Strep, Staph, Cold, Flu, RSV, MRSA, E. coli, H1N1, HIV, RSV, Ebola, and many more... all die
16	Reasonable Price	We want everyone to afford removing harmful chemicals from their homes and businesses and protection from germs.	Our goal is to change the way America disinfects without infecting your pocket book!
17	It Smells like Chlorine?	When Chlorine Bleach or tablets are added to water they produce Hypochlorous +several unwanted and unneeded chemicals.	Hypochlorous is the "Golden Nugget" of disinfecting based on Nature. We produce it with salt water and electricity. Safe, simple and effective. No Harsh Chemicals.
18	Is it baby Safe?	No first Aid warning and no Harsh chemicals. No fumes, no skin irritation.	We have the first EPA approved pacifier sanitizer. Spray the pacifier and put it right into the babies mouth. If accidentally consumed, just drink water, no trip to hospital!
19	Does it work on granite and wooden floors?	CleanSmart is safe to spray on any hard surface, including granite and wood.	Clean and disinfect your kitchen, nursery, bath and office daily without any worries about fumes, chemical residue or wiping it off.
20	How many sprays per Bottle?	Approximately 800 sprays in a stream or a mist for the 23oz and 1588 sprays for the 16oz fine spray mist.	23oz Designed for heavy spraying and cleaning kitchens, baths and nurseries. 16oz designed to replace aerosol disinfectants.
21	How do I store CleanSmart?	Store above 35 degrees and below 85 degrees	Product will freeze and should not be subject to heat. Storing in car not recommended.
22	What is the shelf Life?	18 Months or more.	Do not open the top as oxygen activates the Hypochlorous.
23	Will it Bleach or discolor?	CleanSmart is not a bleach.	We are pH neutral and will not bleach clothes, or surfaces.
24	Can I disinfect carpeting or furniture?	We are an EPA registered hard surface disinfectant.	We cannot make any claims about cloth, leather or any porous materials. CleanSmart will not damage them.
25	What happens if I get it in my eyes or on my skin?	We are pH balanced, so there is no sting or reaction to skin and eyes.	Hypochlorous is actually an approved FDA wound care product for skin and eyes.
26	No Harmful chemicals	Starts out as salt & water and reverts back to salt & water within days.	Hypochlorous produced by electrifying salt water. Simple Science!
27	No Rinse Safety	Old germ killing products require a complete rinse before using again	Lysol, and other cleaners, you need to rinse off due to safety reasons. CleanSmart is so safe, you can spray and leave the product on. No rinse required safety
