Early Years Tasks	Colored Tiles (40 pcs)
<b>1 Make a Tile Train</b>	<p>Can you make a tile train that is longer than 5 tiles but shorter than 9 tiles?</p> <p>Can you make a tile train that is longer than 2 tiles but shorter than 7 tiles?</p> <p>Can you make a train that is longer than 8 tiles but shorter than 12 tiles?</p> <p>Which one of your trains is the longest? Which one of your trains is the shortest?</p>
<b>2 Your Name in Tiles</b>	<p>Can you use the tiles to make the letters in your name?</p> <p>How many tiles do you need for each letter?</p> <p>Which letter uses the most tiles to make? </p> <p>Which letter uses the least tiles to make? </p>
<b>3 How many ways?</b>	<p>How many ways can you make two piles of tiles look the same?</p> <p>How many ways did you find? How do you know they are the same?</p> <p>How did you organize your tile to make them look the same?</p> <p>Did you line them up? Did you make a shape? Did you stack them?</p>
<b>4 More and Less</b>	<p>Make two piles of tiles to show that 3 is more than 2.</p>
<b>5 Hand Toss</b>	<p>Choose 5 tiles and hold them in your hand.</p> <p>Sitting on the ground, gently toss the tiles up and try to catch them again.</p> <p>How many landed on the floor? How many did you catch?</p> <p>Toss them up and see if you can catch just one tile. How many landed on the floor?</p> <p>Toss them up and see if you can catch two tiles. How many landed on the floor?</p> <p>Toss them up and see if you can catch three tiles. How many landed on the floor?</p> <p>Toss them up and see if you can catch four tiles. How many landed on the floor?</p> <p>Toss them up again and see if you can catch them all.</p>

Early Years Tasks	Rekenrek (Student Abacus)
1 I See...	<p>"I see 5 red beads"</p> <p>Where do you see 5 red beads on your Rekenrek? Can you draw the 5 red beads?</p> <p>"I see 2 white beads"</p> <p>Where do you see 2 white beads on your Rekenrek? Can you draw them?</p> <p>Are there any numbers you see on your Rekenrek?</p>
2 How Many Ways.	<p>How many ways can you divide the top row of your Rekenrek?</p> <p></p> <p><b>Example:</b> I can move one white bead over to the other side</p> <p>Did you find 2 different ways?</p> <p>Did you find 5 different ways?</p> <p>Did you find 10 different ways?</p>
3 Guess My Number	<p>Ask someone in your house to play a game with you called "How Many"</p> <p>Use the following clues to guess the number of beads your partner is thinking of.</p> <p>Is it bigger than...? Is it smaller than...? Is it on the top row?</p> <p>Does it include the bottom row? Is it red? Is it red and white?</p> <p>Do I have to push ___ beads over to the other side?</p>
4 Counting One Two Three	<p>You will need two dice and your Rekenrek.</p> <p>Roll two dice and count all of the dots.</p> <p>Find a way to represent the number you rolled on your Rekenrek.</p> <p>You can represent your number any ways you like on the Rekenrek.</p> <p>Try this a few times.</p> <p>What numbers did you roll and what colors of beads did you use to represent your number?</p> <p>What numbers did you roll that you could represent with beads that were all red?</p> <p>What numbers did you roll that you could use red and white beads to represent your number?</p>
5 Counting by 2s	<p>How many ways can you use your Rekenrek to count by 2s?</p> <p>What number can you count to using only the top rack of your Rekenrek?</p> <p>What number can you count to using both the top and bottom racks of your Rekenrek?</p>
