

Allied Dry Erase Markerboard Tables Care and Cleaning

CAUTION

DO NOT USE Harsh chemicals, abrasive cleaners, scouring pads, sharp writing utensils, or other sharp objects on your markerboard or it will scratch.

General Care

Your Allied Dry Erase Table has a durable, high-gloss surface that will last for many years of daily use. To clean your writing surface and restore its original luster, simply wipe the entire surface with a soft cloth moistened with warm water or markerboard cleaner, and immediately wipe dry with a clean soft cloth.

Additional tips

- **Use only Dry Erase Markers** on your markerboard table. Do not use permanent markers as they can permanently stain the surface.
- Do not allow dry erase marker ink to remain on the table for several days without erasing. We recommend that you clean your markerboard weekly to prevent marker color build up.
- Use a dry erase marker *to color over* areas that are hard to clean or develop ghosting. Then erase the problem area. The solvent in the dry erase ink will frequently clean the soiled area.
- If permanent marker is used on the markerboard table in error, simply marking over the permanent ink with dry erase ink will often allow the permanent ink to be removed.
- Use only erasers that are designed for markerboards. [Mr. Clean Magic Erasers](#) work very well. Regular erasers do not work well. A clean soft cloth such as a white t-shirt can be used as an alternative. Only use microfiber cloth if rated for optical use. Some microfiber cloths can be abrasive and may dull the surface.
- Use only cleaning solutions that are specifically made to clean markerboard. Apply the cleaner to the eraser or a clean soft cloth, not directly to the markerboard.
