Ms. Norma Walker  
Nasco International  
901 Janesville Avenue  
Fort Atkinson, WI 53538-0901

Dear Ms. Walker:

We are in receipt of your request for a Material Safety Data Sheet (MSDS) for the Playskool Play-Doh material.

Our Quality Assurance Lab and our Technical Services personnel have assured me that based upon test information performed over the years on the Play-Doh material, a MSDS is not required for this product.

The testing that was done is in accordance with the Occupational Safety and Health Administration (OSHA) guidelines for determining toxicity of materials, which are mixtures of other materials. The testing, which was performed by our Quality Assurance Department or other vendor laboratories, indicates that the compound is non-toxic nor a hazardous material. Therefore, a Material Safety Data Sheet is not required to be filled out for this particular product.

If you have any further questions pertaining to Play-Doh, please feel free to contact me directly at 1-401-727-5663.

Sincerely,

HASBRO, INC.

## Play-Doh Ingredients

### Question

What are the ingredients in Play-Doh?

### Answer

Play-Doh is primarily a mixture of water, salt and flour. It does **NOT** contain peanuts, peanut oil or any milk byproducts. Play-Doh does not contain latex. Play-Doh is non-toxic. However, children or adults who are allergic to wheat gluten or specific food dyes may have an allergic reaction to this product. Furthermore, if a dog ingests Play-Doh, due to its salt content, please contact your veterinarian immediately.

Because Play-Doh is non-toxic, non-flammable and non-reactive, no Material Safety Data Sheet (MSDS) is required for Play-Doh.
