Do not short - circuit battery - may explode.

In case of fire, it is permissible to use any class of extinguishing medium on these batteries or their packing matterial. Cool exterior of batteries if exposed to fire to prevent rupture.

Fire fighters should wear self-contained breathing apparatus.

Section 6 : Accidental Release or Spillage

Steps to Be Taken in Case Maturual is Released or Spilled

Batteries that are leaking should be handed with rubber gloves.

Avoid direct contact with electrolyte.

Section 7: Handling and Storage

Safe handing and storage advice

The battery is extremely sensitive to adverse effects of humidity. Be sure to store them in a place that is dry and subject to little tempeature change. Do not place near boiler or radiator, nor expose to direct sun light. Do not disposeof the battery in fire. Do not charge the battery. Do not short-circuit the battery.
