Introduction

Drive-Thru Menu Math: Add & Subtract Money gives students an opportunity to practice using math in real-life situations. Students learn such skills as reading a menu, figuring food costs, making change, finding how much more money is needed to purchase an item, computing how much money is left over after making a purchase, and totaling receipts. Figuring sales tax is introduced in this book with the help of a 7% sales tax table. As students work the activities, their confidence in reading a menu and figuring the costs associated with it will increase.

The book includes four colorful, realistic drive-thru menus for four different fast-food restaurants. To complete the activities, students refer to the menus to find the prices for menu items in the problems. Activities include addition and subtraction computation problems, as well as practical application word problems. For students who need a refresher on adding or subtracting money, step-by-step instruction pages are located throughout the book.

The menus to be used for each activity are indicated in the upper right-hand corner of each page. Specific math skills used on the page are listed there as well. A general directory of skills may be found in the Table of Contents.

The activities were created for students in grades 3-5 who are struggling with money math skills and are reading at a grade 3-4 reading level.

Table of Contents

Using a Menu.....	1-4

Computation Problems	47-48
Word Problems.....	49-53
Computation Problems	54-55
Totaling Receipts (sales tax & change).....	56-58
Answer Key	59-62

Name _____

Adding money is like adding decimals.
Follow these steps to add money.

ADDING AMOUNTS OF MONEY

Step 1: Line up the decimal points.

$$\begin{array}{r} \$ 1 \quad . \quad 5 \quad 5 \\ + \$ \quad . \quad 7 \quad 5 \\ \hline \end{array}$$

Step 2: Add zeros as placeholders if necessary.

$$\begin{array}{r} \$ 1 \quad . \quad 5 \quad 5 \\ + \$ 0 \quad . \quad 7 \quad 5 \\ \hline \end{array}$$

Step 3: Write a decimal point in the answer.

Put the decimal point under the decimal points in the numbers you are adding.

$$\begin{array}{r} \$ 1 \quad . \quad 5 \quad 5 \\ + \$ 0 \quad . \quad 7 \quad 5 \\ \hline \quad . \quad \end{array}$$

Step 4: Add.

If you need to regroup, do it just as you would with whole numbers.

$$\begin{array}{r} \overset{1}{\$ 1} \quad . \quad \overset{1}{5} \quad 5 \\ + \$ 0 \quad . \quad 7 \quad 5 \\ \hline \$ 2 \quad . \quad 3 \quad 0 \end{array}$$

Name _____

The following prices are from the *On the Go Burgers* drive-thru menu. Find the total when you buy more than one of each item. The first one is done for you.

ON THE GO BURGERS

Addition

- 3-Digit Numbers
- Multiple Items
- Regrouping
