Buying A Home

Housing Cost Game

DIRECTIONS: Before class, ask a real estate agency to give you ten print outs of houses that are on the market. Cover up the cost of the homes with a piece of paper. Hang the pictures of the ten houses around the room. Number the pictures 1-10.

During class, explain that everyone is to walk around the room and “shop” for houses. They are to look closely at the house and the description of the house. Next, they are to write down on a piece of paper the number of the house and what they think that house cost. The student who guesses the most right within \$20,000, wins. Award that student a prize.

After the activity is completed, brainstorm with students about what it is that inflates housing costs.

Materials Needed:

Preparation Required:

- | | |
